Database UniProt\_7.2:\*
1: uniprot\_sprot:\*
2: uniprot\_trembl:\*

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

01-JUN-2003, integrated into UniProtKB/TrEMBL.

01-JUN-2003, sequence version 1.

07-FEB-2006, entry version 18.

Non-specific DNA-binding protein Dps / Iron-binding ferritin-like

antioxidant protein / Ferroxidase (EC 1.16.3.1).

OrderedLocusNames=BC2011; ORFNames=BC_2011;

Dacillus cereus (strain ATCC 14579 / DSM 31).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 PRINTS; PR01346; HELNAPAPROT.
